SUPPLEMENTARY INFORMATION:

I. Background

In the *Federal Register* of June 11, 2010 (75 FR 33311), FDA announced the availability of a guidance for industry entitled “Bioequivalence Recommendations for Specific Products,” which explained the process that would be used to make product-specific guidances available to the public on FDA’s website at <https://www.fda.gov/drugs/guidance-compliance-regulatory-information/guidances-drugs>.

As described in that guidance, FDA adopted this process to develop and disseminate product-specific guidances and to provide a meaningful opportunity for the public to consider and comment on the guidances. This notice announces the availability of a new draft guidance on a generic cocaine hydrochloride nasal solution.

FDA initially approved new drug application 209963 GOPRELTO (cocaine hydrochloride) nasal solution in December 2017. We are now issuing a new draft guidance for industry on a generic cocaine hydrochloride nasal solution (“Draft Guidance on Cocaine Hydrochloride”).

The new draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The new draft guidance, when finalized, will represent

the current thinking of FDA on the information and data to demonstrate BE to support ANDAs for cocaine hydrochloride nasal solution. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Electronic Access

Persons with access to the internet may obtain the draft guidance at either <https://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm> or <https://www.regulations.gov>.

Dated: December 6, 2019.

Lowell J. Schiller,

Principal Associate Commissioner for Policy.
